Summary

Generative AI Engineer with 3 years of experience designing and deploying production grade GenAI applications including Agentic RAG systems, LLM-powered document intelligence pipelines, automated code review agents, and multi-model orchestration workflows. Demonstrated success converting PoCs into enterprise products, achieved **75%** reduction in document processing time and **85%** cost savings by replacing legacy solutions with LLM-based architectures. Proficient in prompt engineering, Semantic Kernel, vector databases, GraphRAG, and Azure AI services. Passionate about leveraging large language models and agentic frameworks to solve complex business challenges at scale.

Technical Skills

GenAI & LLMs: RAG, GraphRAG, Agentic Frameworks, Prompt Engineering, Semantic Kernel, LLM Orchestration, Vision Models, Embeddings, Chain-of-Thought & Few-shot Prompting

AI/ML & Cloud: Azure OpenAI, Azure Document Intelligence, Azure AI Search, Vector Databases, OCR, Azure Function Apps, Azure Cognitive Services, Azure DevOps, AKS

Languages & Frameworks: Python, C#, .NET, Angular, Blazor, SQL, React, REST APIs, Django

Tools & Libraries: Git, MS Graph API, Aspose, Bing Search API, Docker, SharePoint, BMAD Framework

Experience

Fidelity National Financial (FNFI) Bengaluru, India
Software Engineer *Mar 2026 – Present*

- **NC_AI ChatBot (Agentic RAG):** Led a team of 4 to deliver a production RAG chatbot for underwriters over **1,000+ indexed documents**. Implemented header-based chunking with page/section references, SharePoint integration with nightly refresh via Azure Function Apps, cost-effective SQLite vector DB, and AKS deployment with Azure AD certificate auth.
- **ClaimsDocs Migration (Desktop to Angular/.NET 10):** Sole implementer of a full desktop-to-web migration using the **BMAD** spec-driven framework. Delivered end-to-end - PRD to production-ready code - in **one month** (vs. 3+ months for a 2-3 person team). Gained expertise in AI-assisted development and prompt engineering for minimal-review code generation.

Fidelity National Financial (FNFI) Bengaluru, India
Associate Software Engineer *Mar 2024 – Feb 2026*

- **LLM-Based Field Extraction (AFR Replacement):** Replaced Azure Document Intelligence with an LLM pipeline (conditional OCR + vision models). Cut processing time by **75%** (60s to 15s), costs by **85%**, and improved accuracy from **80% to 99%**; added feedback loops for continuous improvement.
- **Agentic Code Review System:** API-driven agent triggered from Azure DevOps on PR creation; performs LLM-powered diff analysis and posts severity-categorized inline comments (critical/major/minor) and a PR summary to accelerate reviews.
- **Automated Mail Processing (C_Metro):** GenAI pipeline handling **2,000+ daily emails**, cutting per-email effort from **15 min to 30 sec**. Covered MS Graph API ingestion, LLM-based key detail extraction, attachment classification via Document Intelligence, and structured DB storage with category tagging.
- **Hybrid RAG (PI Phase 3):** Spearheaded GraphRAG in .NET for the internal AI platform (Personalized Intelligence), overcoming ecosystem limitations by designing a custom Hybrid RAG architecture with Azure AI Search as vector DB.

Fidelity National Financial (FNFI) Bengaluru, India
Software Engineer Intern *Sep 2023 – Feb 2024*

- Built the company's first internal AI platform **(Personalized Intelligence)**: chat/collaboration UI in Blazor, document RAG, and Bing Search API integration. Gained foundational expertise in prompt engineering and Semantic Kernel.

Insti Profile (EdTech Startup) Bengaluru, India
Software Developer Intern *May 2023 – Aug 2023*

- Developed UI components and backend APIs for a cross-college student collaboration platform with project listing, contributor discovery, and skill-based matching features.

Education

RV College of Engineering Bengaluru, India
Bachelor of Engineering in Information Science and Engineering | CGPA: 7.75 *2019 – 2023*

Achievements

- Multiple **Pat on the Back** and **Smart Techie** awards at FNFI
- Consecutive **Achiever** and **High Achiever** awards in PMCR performance reviews
- Participated in company hackathon; implemented an **Automated Underwriting System**
- Actively conducted **GenAI knowledge-sharing sessions** for BAs and cross-functional teams
